

INZINERING DASS

ISO 9001:2015
ISO 14001:2015
ISO 45001:2018

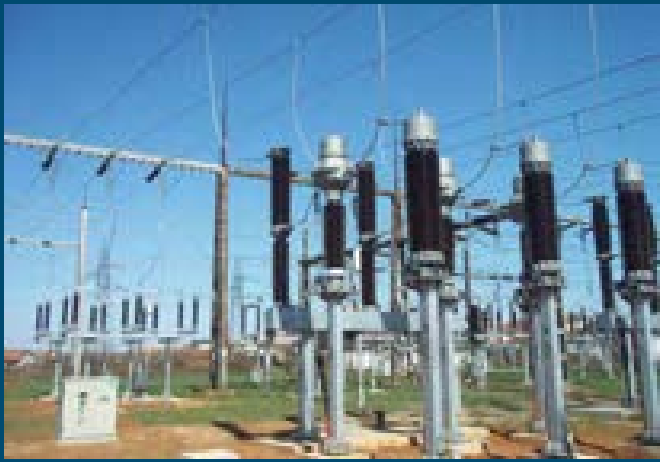

CONSTRUCTION, DISTRIBUTION & ENERGY

Electrical power systems

- Design, production and installation of electrical equipment
- Design, production and installation of distribution and industrial switchgears and transformer substations on 'turn-key' basis
- Design and production of low-voltage and medium-voltage distribution boards
- Production of medium-voltage three-pole indoor switch - disconnectors, TKL 3/12-24

Transformer substations

- Design and installation of transformer substations up to 1000 kV
- Construction of transformer substations on "turn-key" basis
- Refurbishing and maintenance of transformer substations

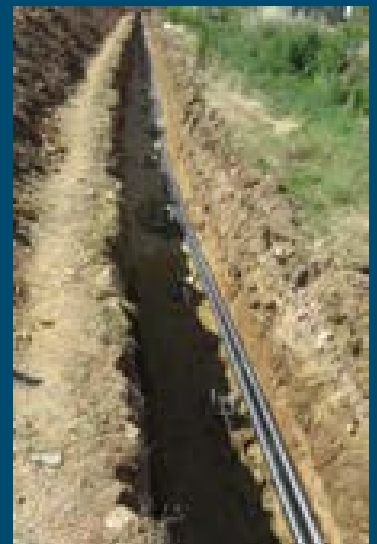

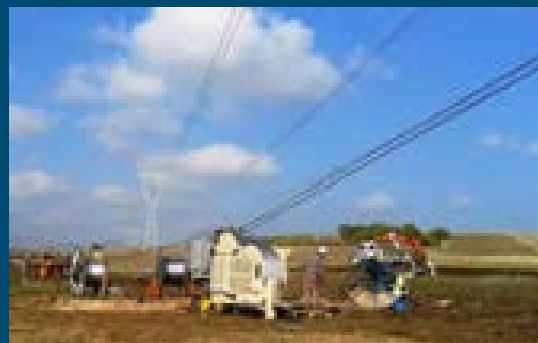

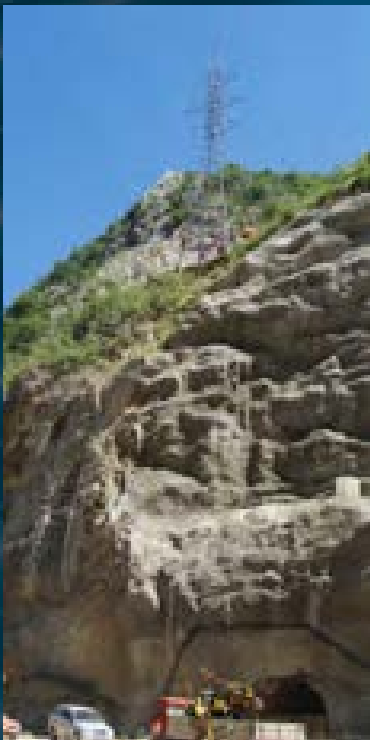

Supply and mounting of containers with electrical equipment for

- High and low voltage
- Thyristor motor drive regulators
- Frequency machine drive regulators
- PLC control systems

Rehabilitation and overhaul of mining machines

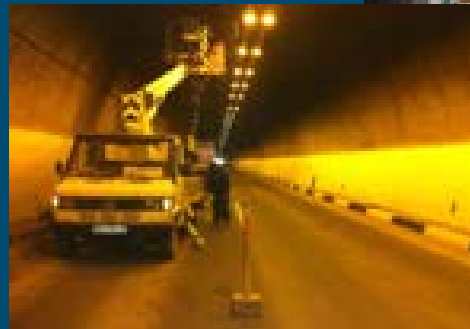

- | | | |
|-------------|---------------------|------------|
| - Esh70/10 | - Conveyance system | - Spreader |
| - Excavator | - Reloading station | |

Testing, protection adjustment and putting into operation of mining plants

Transmission lines

- Design and installation of transmission lines with underground cable up to 220 kV
- Design and erection of overhead transmission lines up to 1000 kV
- OHTL equipment

Construction works and illumination

- Design, production and construction of all types of steel structures
- Erecting of electrical installation for roads, tunnels, highways
- Erecting of electrical installation in residence, business and industrial facilities
- Execution of projects in the field of high-rise building construction
- Erection of facilities in all high-rise building construction and civil engineering, with all stages of erection covered
- The works at facilities may be executed either on “turn-key” basis or in stages
